# Hematopathology Consultation Service

The Hematopathology Consultation Service at the University of Nebraska Medical Center (UNMC) combines an extensive array of diagnostic expertise into a single customer-focused consultation program. An integrated report with the diagnosis, phenotype, and genotype is provided for each case.

Under the direction of Dr. Dennis Weisenburger, our team of hematopathologists provides accurate and timely support during the initial stage of diagnosis, as well as during ongoing disease management. With over 90 years of combined expertise, Drs. Weisenburger, Chan, Greiner, Aoun, and Fu consult on over 2,500 hematopathology cases and over 1,600 bone marrow cases annually. Flow cytometry consultation is provided by Drs. Aoun, Fu, and Pirruccello. Molecular consultation is provided by Drs. Greiner, Fu and Chan. Genetic testing services are provided by the Human Genetics Laboratory under the direction of Drs. Sanger and Dave.

## *Premier Diagnostic Facilities*

The diagnostic facilities in the Department of Pathology and Microbiology include premier laboratories with the latest technology in:

***Immunohistochemistry*** - a sophisticated, automated laboratory with a menu of over 100 stains which are completed within 24 hours.

***Flow Cytometry*** - this full-service laboratory performs more than 7000 assays per year and offers immunophenotyping panels for hematopoietic malignancies and immunodeficiency disorders, as well as DNA cell cycle analysis.

***Molecular Hematology*** - part of a state-of-the-art Molecular Diagnostics Laboratory that performs over 26,000 procedures each year.

***Cancer Cytogenetics and Molecular Genetics*** - The Human Genetics Laboratory performs over 12,000 diagnostic cytogenetic and FISH procedures each year. Drs. Sanger and Dave have extensive expertise in both constitutional and acquired genetic abnormalities.

## *Experience Excellence in Customer Service*

One phone number provides access to our consultants, as well as diagnostic results, billing information, supplies, and service questions. Reports will be sent by fax on the day that the diagnosis is finalized. This usually requires two to three business days from the receipt of case materials, including a tissue block. Several billing options are available including client billing and third party billing (patient insurance) if appropriate insurance and patient information is submitted.

## *How to contact us for your first referral?*

Please call Regional Pathology Services at 1-800-334-0459 and ask for your FIRST-REFERRAL-KIT\*. This simple starter package will provide you with everything you need to refer your first case to us for consultation.

\*Please include all stained slides, including immunostains, along with the pathology reports and other pertinent reports (flow cytometry, cytogenetics, etc;), a representative formalin-fixed paraffin tissue block, and a clinical summary for each case.
