## **Epic Beaker Update #3 Source/Comment Result Changes**

**-Effective June 2026-**

Dear Regional Pathology Services Clients,

The Nebraska Medicine/UNMC laboratory continues to work on our transition to Epic Beaker Laboratory Information System (LIS), integrating all lab departments with other Epic applications already in use. Changes outlined below are related to source/comment results that will be retired in Beaker, along with standardized result codes that may impact clients who perform result-matching. While only matched-result interfaces are directly affected, we believe all clients may find this information helpful.

**These changes will be implemented with the Beaker go-live, June 2026.**

### **TESTS EFFECTED BY SOURCE/COMMENT RESULT CHANGES:**

ADVOT	CCMVD	COV19	HEPCQ	HPVSP	RESPP
ANAPN	CD34S	EBVDO	HHV6B	HPVSPO	STDUR
ANASRX	CDTXAG	EBVQ	HHV6O	HPVTP	VZVD
BKVQB	CMVDO	HCVQR	HIVC1	PARDB	VZVDB
CAURS	CMVQB	HEPBQ	HIVUS	PARDO	VZVDO

**TEST BUILD CHANGES:** See [Epic Beaker Updates - reglab](#)

A summary of Epic Beaker changes is available on [www.reglab.org](http://www.reglab.org) under the Information Systems tab. Thank you for your partnership as we are making these improvements.

**Please contact RPS Interface Support with questions:**

**Community Connect Note:** *With the changes coming with Beaker, the lab and IT team at Nebraska Medicine want to make sure that our Community Connect Partners who are also RPS Clients receive as much information as possible about the changes to lab orders and lab results coming with Beaker. To accomplish this, updates about the timeline for the Beaker project and Orders-related changes will accompany your standard monthly Lab Alerts from the RPS team.*
