Interfaced Clients Update: New Order Codes to Build in Interfaces

Dear Regional Pathology Services Clients,

New test codes have been created in our Lab Information System (LIS). These tests were previously ordered using the Special procedure, blood (SPPRB) or Special Procedure, other (SPPRO) test codes but can now be ordered individually using their own codes. Please update your interfaces accordingly with these new test codes.

A table with test codes and result codes is included below:

TEST NAME	TEST CODE	CPT	RESULT CODE	RESULT DESCRIPTION
Serotonin Release Assay, Unfractionated Heparin	SRAUFH	86022	SRUHL SRUHHD SRUHP SRUHI	Unfract hep low dose Unfract hep high dose Unfract hep porcine Unfract hep interp
Scleroderma(Sc1-70), IgG	SCLER	86235	SCLER	Scleroderma ab, Igg
Risperidone	RISP	80342 (G0480)	RIS 9RIS RTOT	Risperidone 9 OH risperidone Tot risp/9 OH risp
Primidone and Metabolites	PRIMPH	80188; 80184	PRIMI PHENBR	Primidone Phenobarbitol
Paliperidone	PALIP	80342 (G0480)	PALIP	Paliperidone
Lacosamide aka Vimpat	LACO	80339 (G0480)	LACO	Lacosamide aka vimpat
Fluconazole, Quantitative	FLUCON	80299	FLUCON	Flunconazole
Chromatin	CHRMT	83516	CHRMT	Chromatin
Anti-Mullerian Hormone	AMH	83520	AMH	Anti-mullerian hormone

If there are any questions about this interface build please contact us at 402-559-6420 and ask to speak with one of our interface specialists.
