

Supply Shortages

Date: September 20, 2021

Dear Regional Pathology Services Clients,

We wanted to inform clients that we continue to have shortages in blood tube products and other supplies as we are affected by the global shortages.

We are exploring every avenue to make sure clients needs are met. However, clients orders may be partially filled based on an allocation. We ask clients to be cognizant of these shortages and only order as necessary. Thanks for your patience as we navigate these shortages.

Currently we are experiencing shortages in the following:

NEEDLE 5 Tube holder/hub

TUBE105 LiHep PST tube

TUBE104 NaCit blue tube

PHLEBO_10 coban wrap

If you have any questions or issues with these changes, please contact client services at 402-559-6420 and ask to speak with one of the client coordinators.
