
LAB ALERT

Date: March 29, 2021

URGENT Recall of ChloraPrep 3ml Size

Dear Regional Pathology Clients,

Regional Pathology Services received an urgent national recall notification for ChloraPrep 3ml size ONLY, clear and color-tinted product. The recall pertains primarily to other areas of the world, noting the storage issues have not been identified in the US. However, the FDA has advised that BD expand their voluntary recall of this product to the US. Please remove and dispose of this product if you have any in circulation.

Background: ChloraPrep is a skin prep used for sterile procedures. ONLY the 3 ml size ChloraPrep is being recalled and needs to be removed from all clinical areas.

We have removed this supply for our Materials Management warehouse and have already ordered a replacement supply. PHLEBO_20 ChloraPrep One-Step has been discontinued on our supply portal and has been replaced with PHLEBO_20 ChloraPrep Swab Stick.

Product ID	Product Name	Picture	Actions
PHLEBO_20	ChloroPrep One-Step		 
PHLEBO_20	ChloroPrep Swab Stick		 

If you have any questions or issues with these changes please contact client services at 402-559-6420 and ask to speak with one of the client coordinators.
