
Service Interruption Update, May 7, 2025

Dear Regional Pathology Services Clients,

We continue to assess impacted testing due to the water-related damage to instrumentation in the Microbiology and Serology Laboratories. The estimated duration for full resolution remains approximately 6 to 8 weeks.

UPDATES AND CHANGES TO IMPACTED TESTING:

Antinuclear Antibody—

- Discontinue ordering ANASCR and ANAPN temporarily.
 - Order/build the temporary test code ANARUP
- Discontinue ordering ANAIF temporarily.
 - Order/build the temporary test code IFAANA
- ANAFLX, ANA IFA with Reflex to Titer and ANA Autoantibody Panel
 - Replacement would be to order the ANARUP and the IFAANA

Celiac Disease Screening—

- CELSCR, Celiac disease screening
 - Result code ICACEL will not be reported separately.

HIV Panel—

- HIVPN, HIV AG/AB Panel
 - Result codes HIV1AB, HIV1AG, HIV2AB will not be reported separately.

Susceptibility and ID—

- Some are being redirected to our partner reference laboratories.
 - Those results are available via fax and RPS Pathways only.

RESULTS:

- Interfaced clients: Some results will be returned electronically and file as normal, however, some test codes may be changed and will not file as expected. Monitor your systems for unsolicited results. Faxed results will not be available in the interface.
- Non interfaced clients: In some cases, results will be faxed to you, or available in RPS Pathways.
- Please contact Regional Pathology Services Client Services team for results.

TEST BUILD INFORMATION:

ANASCR-Do not order						
ANAPN-Do not order						
Replacement-ANARUP		ARUP 0051668, 2005287 and 0050215
