## Lab Alert: Test Code Change for Vitamin D 25 Hydroxy by Mass Spectrometry

Dear Regional Pathology Services Clients,

Effective March 3, 2025, the laboratory will begin sending D2 & D3 25-OH Vitamin D by mass spectrometry testing to ARUP Laboratories (previous test code VIT25). Specimen requirements remain unchanged, and testing is performed daily.

- New order code **D2D3**—25-Hydroxyvitamin D2 and D3 by Tandem Mass Spectrometry, test is recommended as a second-tier test in specific patient populations and not as a screening test for Vitamin D deficiency. Results available in 1-5 days.
- Screening order code **VITD**—Vitamin D 25 Hydroxy Total by Immunoassay is the standard screening for Vitamin D, provides a total 25-OH Vitamin D concentration (including both D2 and D3) and is performed by automated immunoassay daily at Nebraska Medicine.
- Discontinued order code **VIT25**—delete order code

*CPT code is subject to limited coverage policies for many payers and may require an ABN or Patient Consent for Non-Covered Laboratory Services when ordering. BCBSNE recommends prior authorization.*

### TEST BUILD:

New order code D2D3						
OrderCode	OrderName	ResultCode	ResultName	ResultUnits	RESULT LOINC	CPT
D2D3	VITAMIN D,25 HYDROXY	D2D3R	VIT D,25 D2 D3 TOTAL	ng/mL	62292-8	82306
		D2D33	VIT D,25 D3	ng/mL	1989-3	
		D2D32	VIT D,25 D2	ng/mL	49054-0
